The Tulsa County Sheriff's Office Receives Crime Fighting Tool November 19, 2009

On Friday November 20, 2009, at 09:30 a.m. the Tulsa County Sheriff's Office, located at 303 West 1st Street, will be receiving the state of the art FROMM RDB54 Combat Rapid Deployment Armored Barricade System.

The Barricade System is a product offered by FROMM Barriers, Inc. The barricades are designed to provide immediate and effective protection from a variety of potential threatening situations. In the event of a threatening situation the barriers system can be deployed quickly, easily and will provide dependable protection. The system can be deployed by a single individual, male or female, and does not require the aid of cranes or heavy equipment.

The system offers law enforcement the ability to seal off escape routes, protect assets and protect individuals from ground attacks. With the specially designed breastplate the barrier system is capable of stopping armor piercing rounds from an AK47 Assault Rifle. It is also designed to offer protection as an anti-vehicle barrier capable of stopping a 5000 pound moving vehicle at speeds of 30 mile per hour.

The Tulsa County Sheriff's Office was able to acquire this crime fighting product through a grant offered by the Department of Homeland Security. The initial plans of the office in utilizing this product will be in Special Operation situations, High Risk Search Warrants, the Tulsa State Fair, and Traffic Enforcement Safety Check Points. We are the only law enforcement agency in the area to have such a versatile crime fighting tool.

Several members of the Sheriff's Office and representatives of the FROMM Barriers Company will be on hand Friday to answer question and explain how the devise works. We encourage the media to come and take part in this exciting event.
